

TRADING RULES

The5ers \$100K Summer Plan - 2-Step
LucidFlex \$25K

A practical one-document reference for evaluation, funded-account, risk, news, trading, and payout rules.

Prepared: September 9, 2026

Important: Prop-firm rules can change. This document is a trading reference, not a substitute for checking the firms' live rule pages before placing trades or requesting a payout.

1. Quick Reference

The two accounts have very different risk structures. The5ers is a forex/CFD two-step evaluation with a 10% overall loss limit and 3% daily loss limit. LucidFlex is a futures evaluation where the \$25K account has a \$1,250 profit target and a \$1,000 EOD trailing drawdown.

Rule	The5ers \$100K Summer 2-Step	LucidFlex \$25K
Market	Forex / CFD	Futures
Evaluation	2 phases	1 evaluation
Profit target	10/5 or 8/5	\$1,250
Overall / max loss	\$10,000 (10%)	\$1,000
Daily loss	3%	Optional DLL
Drawdown	10% max-loss model	EOD trailing
Consistency - evaluation	None	50%
Consistency - funded	50%	None
News trading	±2 min high-impact execution restriction	Allowed
Overnight	See Summer plan rules	Must be flat by 4:45 PM EST
Funded split	75/25	90/10

Dashboard rules to remember: The5ers: \$10K max loss, 3% daily loss, no evaluation consistency, 50% funded consistency, and no order execution from 2 minutes before to 2 minutes after high-impact news. LucidFlex: \$1K EOD trailing drawdown, 50% evaluation consistency, no funded consistency, and flatten by 4:45 PM EST.

2. The5ers - \$100K Summer Plan (2-Step)

The Summer 2-Step has two versions: Summer 10/5 and Summer 8/5. The risk limits are the same; the difference is the Phase 1 profit target.

Rule	Summer 10/5	Summer 8/5
Starting balance	\$100,000	\$100,000
Phase 1 target	\$10,000 (10%)	\$8,000 (8%)
Phase 2 target	\$5,000 (5%)	\$5,000 (5%)
Maximum loss	\$10,000 (10%)	\$10,000 (10%)
Daily loss	3%	3%
Evaluation consistency	None	None
Maximum period	Unlimited	Unlimited
Leverage	1:100	1:100

2.1 Passing the evaluation

Summer 10/5: Start at \$100,000 -> Phase 1 target \$110,000 -> Phase 2 target +5% from the Phase 2 starting balance -> funded account.

Summer 8/5: Start at \$100,000 -> Phase 1 target \$108,000 -> Phase 2 target +5% from the Phase 2 starting balance -> funded account.

There is no consistency requirement during the evaluation phases.

2.2 Maximum loss

The overall maximum loss is 10% of the initial \$100K balance = **\$10,000**. The account must stay above the corresponding maximum-loss floor.

2.3 Daily loss

The daily loss limit is **3%**. The daily calculation uses the higher of the relevant end-of-day equity or balance. Hitting the daily loss limit is a hard breach that terminates the account.

Example: if the relevant higher EOD figure is \$106,000, 3% is \$3,180.

2.4 Funded consistency

Once funded, a **50% consistency rule** applies. Your best trading day must not exceed 50% of the total profit used for the relevant withdrawal/scaling calculation.

Example: if the best day is +\$5,000, total profit needs to be at least \$10,000 for a 50% ratio.

2.5 News trading

You cannot execute orders from **2 minutes before through 2 minutes after high-impact news**. Existing positions may be held through the event, subject to the firm's rules.

2.6 Copy trading and EAs

Copying between your own eligible Summer accounts is allowed. Copying another person's trades/signals is prohibited. EAs are permitted subject to restrictions; prohibited behavior includes tick scalping, latency/arbitrage exploitation, reverse/hedge arbitrage, HFT-type activity, and emulators. Stealth/hidden stop-loss behavior is not allowed; EA users must own the source code.

2.7 Payouts and split

Item	Current Summer 2-Step reference
Minimum withdrawal	\$250
Maximum payout per cycle	\$2,000
Profit split	75% trader / 25% The5ers
Funded consistency	50%

2.8 Scaling

Published Summer scaling path: **\$100K -> \$125K -> \$150K -> \$175K**, with the applicable funded profit milestones and 75/25 split.

2.9 Summer account allocation

The published Summer rules allow up to 2 x \$100K accounts for each listed Summer version, with an overall Summer buying-power cap of \$600K across eligible Summer accounts.

3. LucidFlex - \$25K Futures Account

Rule	\$25K LucidFlex
Starting balance	\$25,000
Profit target	\$1,250
Maximum loss	\$1,000
Drawdown	EOD trailing
Evaluation consistency	50%
Funded consistency	None
Maximum position	2 Minis / 20 Micros
Time limit	Unlimited
DLL	Optional
News trading	Allowed

3.1 Profit target

The evaluation target is **+\$1,250**, taking the nominal balance from \$25,000 to \$26,250.

3.2 EOD trailing drawdown

The \$25K account has a **\$1,000 maximum-loss amount** with an end-of-day trailing drawdown mechanism. The published figures include an initial trail balance of \$26,100 and a locked MLL of \$25,100.

The important practical point: the drawdown follows your highest qualifying EOD balance until it reaches the specified trail-lock level, after which the MLL locks according to Lucid's rules.

3.3 50% evaluation consistency

During evaluation, your largest profitable day must be no more than 50% of total profit. For the \$25K account, the basic 50% figure on a \$1,250 target is \$625; Lucid's published example includes a small cushion and shows \$650 in a qualifying scenario.

3.4 DLL - optional

You can choose a Daily Loss Limit configuration when purchasing the account. With DLL enabled, hitting the DLL is a soft breach that locks trading until the next session rather than permanently failing the account. With DLL disabled, there is no daily loss limit, but the \$1,000 maximum-loss / EOD drawdown rule still applies. The configuration cannot be changed on an active account.

3.5 Position size

Maximum position for the \$25K account: **2 Mini contracts or 20 Micro contracts**.

3.6 Trading hours

You must be flat by **4:45 PM EST, Monday-Friday**. Positions may be automatically closed by Lucid at that time. Trading resumes at **6:00 PM EST** Sunday-Thursday.

3.7 News trading

News trading is allowed on Flex accounts. There is no The5ers-style ± 2 -minute high-impact-news execution restriction. Normal execution/slippage risks still apply.

3.8 Allowed and prohibited trading behavior

Allowed: legitimate scalping, scaling into positions/DCA, automated strategies, trade copiers, and flipping, provided all rules are followed.

Prohibited: hedging, high-frequency trading, microscalping/execution exploitation, and martingale-style behavior or continuously adding to losing positions in a prohibited manner.

3.9 Funded account

Rule	\$25K Funded
Maximum loss / drawdown	\$1,000 EOD trailing structure
Consistency	None
DLL	Optional
Position size	2 Minis / 20 Micros
Profit split	90% trader / 10% Lucid

3.10 Payouts

To request a payout, you need **5 separate profitable trading days**, with at least **+\$100** on each qualifying day, and positive net profit for the payout cycle.

Payout item	\$25K LucidFlex
Minimum payout request	\$500
Maximum payout	50% of profit, up to \$1,000
Profit split	90% trader / 10% Lucid
Maximum payout cycles before live transition	5 payouts per account
Funded consistency	None
Payout buffer	None required

4. Side-by-Side Rule Sheet

Rule	The5ers \$100K Summer 2-Step	LucidFlex \$25K
Market	Forex / CFD	Futures
Evaluation	2 phases	1 evaluation
Target	10/5 or 8/5	\$1,250
Max loss	\$10,000	\$1,000
Daily loss	3%	Optional DLL
Drawdown	10% max-loss model	EOD trailing
Evaluation consistency	None	50%
Funded consistency	50%	None
News	±2 min execution restriction	Allowed
Trading close	Summer rules apply	Flat by 4:45 PM EST
Max position	Leverage-based	2 Minis / 20 Micros
EA / automation	Restricted	Allowed subject to rules
Copy trading	Own eligible accounts only	Allowed subject to rules
HFT	Prohibited strategies	Prohibited
Hedging	Prohibited/restricted strategies	Prohibited
Scalping	Allowed within rules	Legitimate scalping allowed
DCA	Subject to strategy restrictions	Allowed; avoid prohibited martingale
Funded split	75/25	90/10
Minimum payout	\$250	\$500
Payout cap	\$2,000/cycle	\$1,000 for \$25K
Payout-day requirement	N/A	5 x \$100 profitable days

5. Breach-Prevention Checklist

Before every trading session

- Check today's high-impact news if trading The5ers.
- Know your current daily-loss threshold on The5ers.
- Know your current EOD trailing MLL on LucidFlex.
- Confirm position size is within the firm's limit.
- Decide your hard personal stop before entering.

During the session

- Do not let The5ers reach its 3% daily-loss limit.
- Do not let either account approach its hard drawdown limit.
- Do not place The5ers orders inside the ±2-minute high-impact news window.
- Do not use prohibited arbitrage, HFT, hedging, microscalping, or signal-copying behavior.
- Keep LucidFlex positions within 2 Minis / 20 Micros.

End of day

- Flatten LucidFlex positions by 4:45 PM EST.
- Review EOD balance and trailing threshold.
- For funded The5ers, track best-day profit versus total profit to maintain 50% consistency.

- For LucidFlex funded payouts, track qualifying +\$100 profitable days.

6. Official Sources

The figures and rule descriptions in this reference were based on the official rule pages cited in the original comparison. Because prop-firm terms can change, verify the live rules before trading.
